FOLD PLAY .COM

SUMMARY OF DIRECTIONS

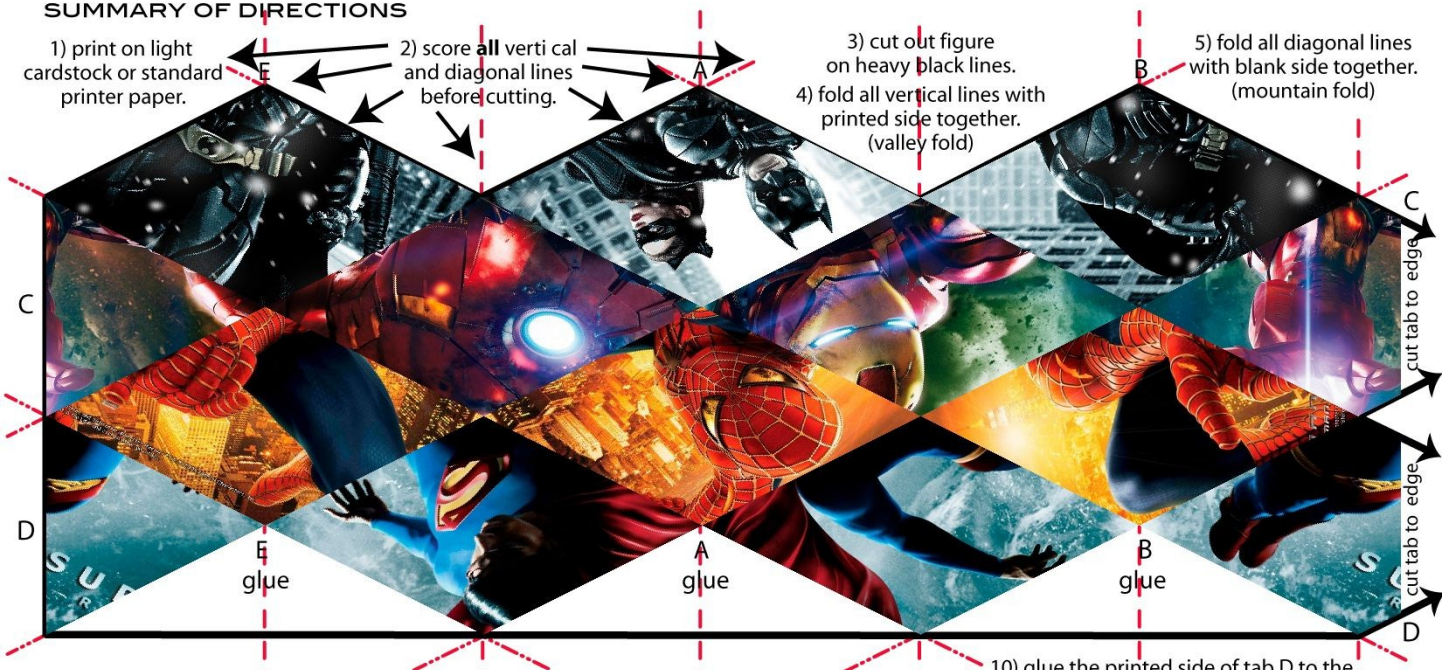

1) print on light cardstock or standard printer paper.

2) score **all** verti cal and diagonal lines before cutting.

3) cut out figure on heavy black lines.

4) fold all vertical lines with printed side together. (valley fold)

5) fold all diagonal lines with blank side together. (mountain fold)

6) gently encourage the model into a tubular form by pushing the two points labeled A towards each other.

7) glue the diamond-shaped point A onto to white triangle A.

8) glue the diamond-shaped point B onto to white triangle B.

9) bring the tab C to edge C forming a ring. glue the printed side of tab C to the blank side of edge C using the vertical fold as a guide. don't make the ring too tight. the picture overlaps a bit to give the model play.

10) glue the printed side of tab D to the blank side of edge D using the vertical fold as a guide.

11) glue the the diamond-shaped point E onto to white triangle E.

you're done! (after the glue dries.) pull on the outside edge while pushing up from underneath to "turn" your kaleidocycle.
