Der gelbe Ton bezeichnet einen Innenteil, der mit Karton verstärkt wird. Die Materialstärke des Kartons soll 1 mm nicht überschreiten. Im Notfall genügt eine 1-2fache Hinterklebung aus Abläßen des Bogens.

Yellow denotes a part which is to be strengthened with cardboard. This should not be thicker than 1 mm. Failing suitable material, it is sufficient to glue on one or two layers of the left overs from the cut-out sheet.

La couleur jaune indique qu'il s'agit d'une partie intérieure qui sera renforcée avec du carton. L'épaisseur du carton ne doit pas dépasser 1 mm. On peut, au besoin, utiliser les restes de découpes en les collant en simple ou double épaisseur.

Il colore giallo indica una parte interna della costruzione che deve essere rafforzata con del cartone. Lo spessore del cartone non deve superare 1 mm. All'occorrenza basta incollare nel retro uno o due strati di scarti dell'arco.

El tono amarillo señala una parte interior de construcción que se fortifica con cartulina. El espesor de la cartulina no debe sobrepasar un milímetro. En caso de necesidad alcanza con pegar una a dos capas de restos del pliego detrás de esa parte.
