Instructions:

1. Cut out the Pixel Pages by cutting along the solid black lines indicated by the scissor icon.
2. Cut the solid grey lines and the outline of the pixel art, being careful NOT to cut the dotted grey lines. Notice that the white "strips" along the top of the pixel art must stay connected to the art. Cut out any white areas marked with a grey "x". Score the dotted lines.
3. SLOWLY fold the top into the bottom and the art should begin to pop out. Once it's popped slowly fold the entire thing completely in half and smooth down. Open it back up and display!
