

biwin.co.uk

- 1) Cut out shape, and all slits (thin-outlined rectangles, there are eleven).
- 2) Fold all creases, pretty much everything is folded color outward, except tab E and H, and the inner fold on the pant legs.
- 3) Go ahead and fold the tongue all the way around so it pokes out the mouth slit.
- 4) Insert tab A into slit B, and then again with tab C into slit D. The gently press each ear thru the slits in the middle of the head on either side.
- 5) Fold the arms so that E meets F and G meets H. Fold tabs E and H with the color inward. Then carefully insert each arm into the slits on the body below the ears.
- 6) Insert tab S into slit T, then repeat with tab U into slit V.
- 7) Moving down the back, insert tab W into slit X and again with tab Y into slit Z.
- 8) The remaining flap is folded inside the body, and if possible, try to cover the tabs on the back, because it will make the model more secure.
